

Ideal monitoring solution for swat, tactical and active shooter scenarios

Medical equipment designed to move with you

TACTICAL PAC MULTI-PATIENT MONITORING

The small size and light weight of the *WVSM*® (*Wireless Vital Signs Monitor*) makes it one of the most portable FDA cleared medical monitors on the market. *Tactical Pac* further enhances this capability by placing two *WVSM* monitors directly at hand, in any scenario. With *WVSM* and *Tactical Pac* you can now monitor multiple patients, on the move, at any time.

Tactical Pac is an adaptable MOLLE pouch specifically designed to hold two *WVSMs* and all accessories, including a centralized monitoring device such as a smart phone.

The Tactical Pac includes two WVSM devices with peripherals

WVSMs are certified air-worthy devices

The WVSM® *Tactical Pac* is designed to bring automated, multi-patient monitoring capability wherever you go in a lightweight, modular package.

Each *Tactical Pac* features:

- Two (2) WVSM®s with peripherals (Measuring NIBP, HR, SpO2 and ECG)
- Optional centralized monitoring device

Removable leg straps allow Tactical Pac to be strapped to a pack, vest or thigh

A wide opening facilitates immediate access and organizational pockets keep contents secure and manageable

Tactical Pac may also be ordered with one (1) WVSM, one (1) TacVac™ Suction Device, one (1) tourniquet and Combat Gauze®, as well as an optional monitoring device.
