

Be a Hero Help Save a Life

A Defibtech AED in the workplace can make the difference between life and death.

Defibtech Lifeline AEDs

- ♥ Unprecedented ease-of-use
- 🔗 Robust and durable
- 🔧 Easy maintenance

Offering the best selection for saving a life.

Protect your most valuable asset—your employees.

Sudden cardiac arrest (SCA) can happen at any time. And when it happens outside the hospital fewer than 8% survive. In fact, SCA is such a serious medical emergency that survival rates decrease by 7-10% for every minute that passes without a shock. Fortunately, defibrillation using an automated external defibrillator (AED) within three minutes can increase survival rates to more than 70%.

Should an employee, customer, vendor, or any other person at your workplace suffer sudden cardiac arrest, a Defibtech Lifeline AED can make the difference between life and death. Decision makers are turning to Defibtech for its innovative offerings.

- Over 200,000 sold worldwide: Deployments include workplaces, government buildings, airports and aircraft, rail stations and trains, educational institutions, emergency vehicles, resorts, arenas, and marine vessels
- Lifeline was the most successfully used AED in a study of minimally trained users

With a Defibtech AED, help is always within reach.

Defibtech Lifeline AEDs are so easy to use, virtually anyone can be a lifesaver.

- Clear voice prompts with visual text guidance and brightly lit progress lights, or full-color video displays, lead the user through the rescue step-by-step
- Built to U.S. Military specifications, Lifeline AEDs are robust, dust protected, and spray / water resistant
- Lifeline AEDs are field upgradable on-site when CPR guidelines change
